

We use and sell only the German **PRIMAVERA Life** brand of essential oils. After years of clinical use and research with other product lines, we now know what European doctors do.... PRIMAVERA Life's are by far the finest **'therapeutic grade'** oils of their kind in the world today. Consider the following when shopping for essential oils:

Essential oils are not all created equal. Many are fine for aromatherapy purposes, but only **'therapeutic grade'** essential oils (depending on the oil) are suitable for other applications which can include topical use, inhalation therapy and oral ingestion. Many essential oils available on the market today are in some way altered from their original composition by blending, cleaning or bleaching. Many are 'cut' with cheaper synthetic or vegetable components, even though the label may read '100% pure'. Temperature and duration of the extraction process are important factors that determine quality and price of an essential oil. Of great concern is that the oils are genuine and unchanged, and extracted properly in order to become the highest grades. The oils we use from PRIMAVERA Life are either wild grown, organic or DEMETER organic, and are extracted by means of cold pressed or steam distillation. No solvents are used, which are toxic. **Each and every bottle of PRIMAVERA Life oils have a clear declaration of the extraction method, characteristics, cultivation type, part of plant used, name of botanical species and origin of the essential oil, with quality and purity determined and assured by gas chromatography, enantiometer separation, scent, color & taste.**

The PRIMAVERA Life company is also eco-friendly, as they support existing and new organic farming methods and initiatives worldwide. The following are the well-respected organic associations and institutions that certify PRIMAVERA Life products:

- Agrobio (Portugal)
- Bioagricoop (Italy)
- Biotop (Isreal)
- Biological Farmers of Australia (Australia)
- Consejo Regulado de la Agricultura Ecologica (Spain)
- DEMETER (Germany)
- INCA CERT (Peru)
- Institut fur Marktökologie (Germany)
- NASAA (Australia)
- Nature & Progres (France)
- Naturland (Germany)
- Organic Crop Improvement Association (USA, Canada, Mexico)

In addition, the quality of PRIMAVERA's oils are audited annually by BCS Okogantie GmbH, the BNN Association and the DEMETER Association. DEMETER supports biodynamic farming, and its guidelines, philosophy and regulations are considered to be the strictest of any organic association in the world.

In Europe, PRIMAVERA Life has a reputation for quality that is second to none. For colds, coughs, injuries, emotional release therapy, immune challenges, stress reduction or aromatherapy, we use and sell only the best 'therapeutic grade' oils in the world.
